EDUCATION

Srinakharinwirot University (SWU)	2024 – Present (Expected 2026)
<i>Bachelor of Engineering in Computer Engineering</i>	<i>Bangkok, Thailand</i>
- Specialization: Statistical Machine Learning, Financial Risk Modeling, and Distributed Data Engineering. - Relevant Coursework: Machine Learning, Database Systems, Operating Systems, Algorithms, Software Engineering.	

TECHNICAL SKILLS & COMPETENCIES

Programming:	Python (Expert), SQL (PostgreSQL, MySQL), C, C++, Java, R, Bash scripting
Machine Learning & XAI:	LightGBM, XGBoost, Scikit-Learn, SHAP, LIME, OptBinning, SMOTE-Tomek, Pandas, NumPy
Data Eng & DevOps:	Apache Spark, Apache Airflow, Docker, FastAPI, PostgreSQL, Git, CI/CD pipelines
Languages & Ethics:	Thai (Native), English (B1+ Professional), Japanese (Elementary) • Clean OOP, PEP-8

FEATURED ENGINEERING PROJECTS

Enterprise Credit Risk Scoring & Explainable AI (XAI)	2026
<i>Python, LightGBM, SHAP, FastAPI, Docker • Basel II/III Credit Decisioning Engine</i>	
- Constructed WoE and Information Value (IV) pipelines to discretize financial attributes into monotonic risk bins. - Integrated SHAP TreeExplainer to produce legally defensible Adverse Action notices (ECOA/FCRA compliant). - Deployed asynchronous containerized FastAPI service delivering Probability of Default (PD) scoring in <50ms.	
Long Overdue Debtor (LOD) Classification System	Dec 2025
<i>LightGBM, XGBoost, Scikit-Learn • Aihack Thailand 2025 National Finalist</i>	
- Formulated temporal delinquency velocity ratios and credit exhaustion slopes across ~40,000 blind split records. - Trained tuned LightGBM and XGBoost ensembles via 5-Fold Stratified CV, achieving 0.894 ROC-AUC.	
Industrial IoT & Telemetry Pipeline	2026
<i>PostgreSQL, Apache Spark, Apache Airflow, Docker • Automated Batch ETL</i>	
- Engineered multi-container pipeline ingesting high-frequency vibration and thermal telemetry across factory lines. - Automated scheduled Airflow ETL with stateful anomaly thresholding, surfacing real-time OEE on dashboards.	
GuardianAI – Clinical Frailty & Fall Risk Intervention	Jan 2026
<i>XGBoost, SHAP, FastAPI • True Innovation Launchpad Track</i>	
Trained calibrated XGBoost models coupled with SHAP biometric explainability for real-time geriatric care.	
COMPETITIVE HACKATHONS & INDUSTRY CHALLENGES	
AIRA & AIFUL / Aihack Thailand 2025 – National Finalist	Dec 2025
<i>Machine Learning & Financial Risk Modeling Lead • Chulalongkorn Business School × ProbSpace</i>	
<i>Bangkok, Thailand</i>	
Handled severe 1:12 default imbalance using SMOTE-Tomek; pitched risk reduction vs. interest margins to C-executives.	
True Innovation Launchpad 2026 – AI & Data Science Lead	Jan 2026
<i>Healthcare Track (Team Nakphatthana Tuapralat) • Sub-30ms clinical risk scoring APIs</i>	
<i>Bangkok, Thailand</i>	
GISTDA Spatial Resilience Hackathon & LINE MAN Case Competition	2024 – 2026
<i>Spatial Lead (GISTDA Rain-to-Flood Mapping) • Growth Lead (LINE MAN Wongnai 8.87 THB CAC)</i>	
<i>Bangkok, Thailand</i>	

CERTIFICATIONS & STANDARDIZED ASSESSMENTS

SKILLKAMP by KBTG: Data Analyst (STAMP) Score: 97/150 (Benchmark: 90) • Digital Marketer Score: 98/150 (Benchmark: 94)
Oxford Placement Test: CEFR B1+ Professional (Score: 51/120 – Listening: 51.12, Grammar: 50.88; AUA / Oxford)
